

- Ph.D. in Bioinformatics and biochemistry with 3 years postdoc experience.
- 6 high-impact publications and 10 conference presentations of research results.
- Accelerated NGS and gene therapy data analysis and visualization pipeline 10-fold faster by using Python, pandas, matplotlib, R, C++, scikit-learn, statistical modeling, data visualization, and machine learning.
- Developed novel next-generation sequencing (NGS) methods to increase over 4,000-time efficiency in improvement of efficacy and safety in gene editing therapeutics.
- 7 cross-functional biochemical projects, resulting in 4 scientific collaborations with \$2,540,000 funding.

SKILLS

Programming Languages Experienced with	Python, R, Perl, Matlab, SQL, C++, L ^A T _E X, Markdown
Miscellaneous	Next-generation sequencing (NGS) methods development, RNA-Seq, classification, regression, clustering algorithms, DNA, Apache Airflow, Tensorflow, PyTorch, pandas, matplotlib, scikit-learn, Data visualization, Natural language processing, Origin, High throughput assays, HPLC, Mass Spectroscopy, Biochemistry, Molecular Biology, RNA, Protein Purification, time-management, communication skills
	SQL, git

EXPERIENCE

Postdoctoral Associate <i>Department of Chemistry, University of Florida</i>	Feb 2017 — Dec 2019 <i>Gainesville FL, USA</i>
--	--

- Managed 4 projects and presented in 2018 national ACS meeting.
- Accelerated NGS data analysis pipeline 10-fold faster by using Unix/Linux shell commands, Perl, Python, R, C++, Pandas, scikit-learn, MATLAB, statistical modeling, data visualization, and machine learning algorithms.
- Optimized the accuracy and efficiency of enzyme kinetic isotope effect measurements for drug discovery 10-fold by introducing HPLC, LC-MS, mass spectrometry, FRET, stopped-flow, CD spectroscopy, and micro-plate assay.

Technologies: Python, R, Tensorflow, Pytorch, Scikit-learn, Data visualization, Perl, LC-MS, Next Generation Sequencing (NGS), RNA-Seq, Enzyme assays, Origin, FPLC, HPLC, Mass Spectroscopy

Graduate Research Assistant <i>Case Western Reserve University,</i>	Aug 2011 — Jan 2017 <i>Cleveland OH, USA</i>
---	--

- Led 3 projects, presented in 7 national/regional conferences and published 5 papers on top peer reviewed journals.
- Integrated biological knowledge, statistics and genomics to explore and convert unstructured data (e.g. , Next generation sequencing (NGS) results and RNA structures) into numerical features and developed feature selection and pattern recognition pipeline by Python, scikit-learn, R, C++, and MATLAB.
- Applied Machine learning algorithms (e.g. , k-mean, random forest, neural network, novel linear regression models, PCA, and t-SNE) to predict and visualize the rules of biomolecule interactions and accelerate the data driven experimental design 30-fold faster than current methods.
- Developed and implemented High Throughput Sequencing methods, KINetics and EQUilibrium (HTS-KIN/EQ) to increase the pace of gene editing research by more than 4000 times.

Technologies: R, Python, Matlab, Scikit-learn, Data visualization, Tensorflow, Pytorch, t-SNE, PCA, NGS, Origin, FPLC

Research Assistant <i>Kaohsiung Medical University,</i>	Jun 2009 — July 2011 <i>Kaohsiung Taiwan</i>
---	--

- Developed and optimized BMP-2 gene therapy for osteonecrosis by applying micro-CT, immunohistochemistry, Western blot, ELISA, and real-time PCR.

HANDS-ON EXPERIENCE

- Built CycleGAN voice converter and miRNA generator from scratch by Tensorflow 2.0 and Keras.
- Applied Natural language processing, Embedding, LSTM, and Transformer models to generate texts, categorize articles, and visualize the rules of RNA-Protein interactions.

EDUCATION

Ph.D. in Biochemistry , <i>Case Western Reserve University, Cleveland OH, USA</i>	2011 — 2017
M.S. in Biochemistry and Molecular Biology , <i>National Cheng Kung University, Tainan Taiwan</i>	2005 — 2007
B.S. in Chemistry , <i>National Taiwan University, Taipei Taiwan</i>	2001 — 2005

CONFERENCE TALKS

1. Hsuan-Chun Lin, Benjamin Weissman, Syed Shahbaz Gardezi, Vernon Anderson, Darrin York, Joseph Piccirilli, Michael Harris 2018 ACS National meeting New Orleans, March 22-26
Kinetic isotope effects on catalysis by the HDV ribozyme-precise determination of isotope ratios using electrospray ionization time-of-flight mass spectrometry
2. Hsuan-Chun Lin, 2014 Rustbelt RNA meeting Pittsburgh, October 17-18
Next-generation tools for RNA enzymology: Determination of rate and equilibrium constants for large populations of RNA substrate variants using high throughput sequencing.
